

What is the b in $8b=5.6$

$B = 0.7$ because 5.6 divided by 8 equals 0.7! Hope this helpz... $B = .7$

Explanation: Since we are doing multiplication ($8 * b$) we would now do the inverse operation which is dividing. First, it's 5.6 divided by itself so we can cross that out, then 8 divided by 5.6 = .7

If we put $8 * .7$ in a calculator, sure enough, it comes out as 5.6

2. This was the name of Chaucer's tale about pilgrims on the road. a. Morte d'Arthur

b. The Canterbury Tales

c. Gawain and the Green Knight

d. Pillars of the Earth

Which inner planet is the largest? A.

Mercury

B.

Venus

C.

Earth

D.
Mars

who every answers this right get a metal :D don't lie plz

Why is North Africa subject to foreign invasions? Choose all answers that are correct. A. Its location on the Mediterranean Sea provides ports and access to other waterways. B. Other countries want to control the oil and natural gas reserves found there. C. The large deposits of gold throughout North Africa make it attractive to other countries. D. Write this number in word form 5,487

Janet purchased a concert ticket on a website the original price of the ticket was \$75 she use a coupon code to receive a 20% discount the website applied 10% service fee to the discount price ticket was less than original price by what percent

The body needs _____ to synthesize fatty acids.

A good man is a decent life, and a bad man is a cursed life—but no matter what, always expect suffering, and just keep working hard. No one will take care of a poor woman—just ourselves"

Literal equations $2x - 3y = 8$ solve for y

Mary and Julie both have a goal of raising \$1000 for charity. Mary raises \$12 every 4 days. Julie raises \$19 every 6 days. Will Mary or Julie reach her goal first? Explain.

Why didn't Kangaroos live in England ?

$2\text{C}_6\text{H}_{14} + 19\text{O}_2 \rightarrow 12\text{CO}_2 + 14\text{H}_2\text{O}$ How many atoms, total, are reacting in this equation?

.Scientific progress requires that we clearly define the question we wish to answer. A clear, sharp definition of a scientific question is often the most difficult step in the process of discovery. Which of the following is the most accurate and complete description of the specific scientific question or problem we will address in this course? a.Humans have no individually unique properties; however, the specific combination of properties we have is not seen in other animals and these properties evolved very rapidly after our divergence from the other apes.

b.Humans have specific objectively measurable properties no other animals have and we acquired these properties over a short evolutionary time period when other ape lineages were changing relatively little.

c.Humans have no individually unique properties; however, the specific combination of properties we have is not seen in other animals and these properties evolved very slowly after our divergence of the other apes.

d.Humans have objectively measurable properties no other animals have and we acquired these properties over a long period of slow change after our lineage's divergence from other ape lineages.

Is the following relation a function? X Y

6 -1

-1 2

4 3

0 3

Yes or no

A television camera lens has a 17-cm focal length and a lens diameter of 6.0 cm. what is its number?

Beryllium, magnesium and calcium all are located in the alkaline earth group. Which of these characteristics do these elements have in common?

Which best describes the influence of the National Revolutionary Party on Mexico after the revolution??

Mosses that reproduce with gametes are vascular seed bearing gametophytes , and those that reproduce with spores are seedless sporophytes nonvascular .

Which division problem is equivalent to $3/8$? A- Cut 3 equal sections from an 8-foot-long ribbon.

B- Divide 8 by 3

C- $8 \div 3$

D- Divide 3 by 8

I'm trying to get passed a TTM (think through math) lesson without going through it by passing the pre-test, if I only miss 2 questions (i've only missed 0 xD) I can skip it! <3
